

ARCHOS | *1.5 VISION*

So thin and so light! This is the impression that the A1.5 vision player will give you once you get your hands on it. Even with its feather weight, this device is not light on features.

- Incredibly slim form factor (less than 6mm) with a 1.5" color screen
- Buttons with capacitive touch surface for your fingers to glide through your menus and content
- 4GB¹ to store and listen to up to 2,000 songs²
- Play MP3, WAV, FLAC, APE and WMA music files
- Store thousands of JPEG and BMP photos³
- Listen to your favorite FM radio programs live or record them to enjoy later.
- Record your voice memos thanks to the built-in microphone

Slim and light

At less than 6 mm (1/4") thick, the ARCHOS 15 vision has the perfect form factor to be slipped right into your pocket. And at only 18 grams (0.6 ounces), it won't be another heavy product you'll be carrying.

The 1.5" screen is just the right size for browsing through your music files, viewing some pictures from time to time, or even sharing some videos with your friends.

Music player

The ARCHOS 15 vision plays not only the common music file formats (MP3, WAV and WMA), but also some of the more advanced ones (FLAC, APE). This will please those who need a small MP3 player capable of playing just about any music file they have copied over from their computer.

It's got 4GB storage Flash capacity, which means you can store up to 2,000 songs. What more can you ask from a 6 mm thin MP3 player?

FM Radio

If you're tired of your own music files, what about some radio? News, talk, or the latest hits await you! The ARCHOS 15 vision quickly scans the FM band and saves all available stations as presets so you can enjoy them more easily.

And if you're interrupted while listening to an enjoyable radio show, you have the possibility to record it. Then take your time later and pick up from where you left off. It's just a thumb press away.

Photo, video and voice recorder

In order to offer a complete mini-sized multimedia player, the ARCHOS 15 vision also features a photo wallet application and a video player. You can store up to 40,000 photos on the 4GB internal memory and share them with friends and family.

Or if you're more into video, just watch a TV show you've transferred from your PC when you have some time to kill.

There's also a built-in microphone for recording your voice. It's a great little feature when you need a pen and you can't seem to find one.
